IMMEDIATE GRAFT

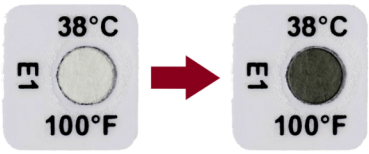

REFRIGERATE PRODUCT UPON ARRIVAL

- Ready to use
- No mixing required

STORAGE

Product will be shipped in an insulated shipping box and/or with cold packs, which may thaw during shipment. If the gray temperature indicator located on the product packaging is **black** upon arrival, the efficacy of the graft material may have been compromised. Please contact SteinerBio immediately for instructions to replace the products: (866)317-1348

NOTIFY US IMMEDIATELY IF TEMPERATURE DOT IS BLACK

DIRECTIONS

- After extraction and placement of immediate implant, fill voids between the implant and bone with Immediate Graft.
- After placing Immediate Graft, cover with a d-PTFE (Teflon) membrane or temporary crown.

OR

- Place healing abutment, graft, and seal gingiva around healing abutment if in the anterior region with Oral Bond to create a hermetic seal and prevent oral fluids and bacteria from entering the grafted site.

OR

- Place healing abutment, graft, and place temporary crown.

PRECAUTIONS

Do not overfill. Do not compromise blood supply to the defect area. This product has not been studied in pediatric patients. Immediate Graft is not intended for immediate load bearing. Do not mix with any other graft materials other than SteinerBio bone grafts. Do not use animal or human membranes or sutures to cover or the graft may fail.

Federal law restricts this device to sale by or on the order of a dentist.

IMMEDIATE GRAFT

DESCRIPTION

Immediate Graft is a combination of Socket Graft and OsseoConduct βTCP granules (250-500µm). The βTCP granules are premixed in this product. This product contains no human or animal tissue.

SOCKET GRAFT

Socket Graft is a dual phase calcium phosphate based synthetic bone graft material. It is designed to quickly and safely treat the extraction socket, to retain alveolar bone, stimulate bone formation, and reduce post-operative complications. This product is designed to be quickly and completely resorbed, to produce normal, healthy vital bone.

Socket regeneration (preservation) insurance code: D7953

INDICATIONS

Immediate Graft is a bone graft material indicated for grafting small bony defects.

CONTRAINDICATIONS

This product is contraindicated in individuals who are unable to follow post-op instructions.

OSSEOCONDUCT

OsseoConduct is a synthetic, microporous, biocompatible, third generation beta tricalcium phosphate bone grafting material. OsseoConduct is resorbed and replaced by bone in 4-6 months and is intended for use as a general bone graft material. OsseoConduct is designed to maintain shape and volume when used for ridge augmentation or socket grafting and lateral window sinus augmentations. OsseoConduct is not approved for immediate support of removable dental appliances.

INDICATIONS

OsseoConduct is intended for use as a maxillofacial bone graft material in bone voids and for appositional growth.

CONTRAINDICATIONS

OsseoConduct is not indicated where loading of the graft site is planned, such as oral sites that are intended to be loaded immediately with removable dental prosthesis.

WARNINGS

Immediate Graft is single use only. Do not re-sterilize or reuse.
Do not use Immediate Graft if the package has been opened or damaged, or has exceeded the expiration date. Do not use if the temperature indicator on the packaging has turned black.
